Satya Marg Solutions, Inc. is a 14 year old Global Information Technology consulting company providing a full range of IT consultancy services with expertise in diversified domains and technologies. We are a group of highly skilled IT professionals dedicated to maintaining the highest level of customer satisfaction and to offering our customers with first class services. To achieve these, we have a team of well qualified, experienced and energetic full-time employees with proven track record on SMS payroll that we place at the client site on a contractual basis for a stipulated period of time for their projects.

#### **RECRUITING & STAFFING SERVICE:**

SMS's reputation speaks for itself and we encourage you to compare us to the competition! Our model is proven and innovative; SMS recruiters have an in-depth and intimate knowledge of the local market and the technical credentials to deliver on specific and complex client needs.

#### **Job Placement**

SMS's job placement services are tailored to IT professionals and IT executives who are equipped to take on challenging roles at top-notch companies. Our staff will successfully guide you to opportunities that will advance your career!

#### **Technology Consulting**

Choosing the right underlying information systems, both at the application and infrastructure level, is the

backbone to ensuring you can meet the strategic needs of your business. Working closely with you, SMS presents a clear vision of the state of your current and future **enterprise architecture**. Our philosophy is based on the realization that **business processes** and their supporting applications and systems can only be fully understood, implemented, supported and improved by understanding their interdependencies.

#### **Business and Technical Requirements Gathering**

Prioritized business requirements for the implementation of your future information technology solutions are required to ensure that you choose the appropriate technology to meet your company's needs. SMS will work with you by facilitating sessions with your business unit stakeholders. The outcome of the business and technical requirements gathering is a list of processes and requirements that are turned into

a specification document which is used as the benchmark for future technology implementations and/or optimizations.

#### **TECHNOLOGY**

SMS is **partnering** with highly trained technology consultants who serve as your experts to help complete important technology projects and to provide escalation assistance across a broad range of technologies including:

- Cloud-Based Solutions - Selection, migration and support
- Network Administration-Design & troubleshooting of LAN/WAN systems
- Storage & Backup - Installation, Management & Support
- Server Management - Installation, Management & Support
- Packaged Applications - Selection, Tier 1 & 2 Onshore / Offshore Support

#### **OUTSOURCING**
